Thazhacode house, Nannambra, Theyyalingal(PO), Malappuram, Kerala

## Objective

---

Understand the domain and find out the perfect product to fit the market demand. Identify the current user's need and pain points from the available system, develop the solution and release it. Coordinate with champion users to get the feedback on new design of the solution and Explore the different Tech Stack for Cross platform development. Providing continued maintenance and development of bug fixes for existing mobile applications. Proposing technical solutions for new architectural designs and suggesting options for performance improvement of apps. Integrating apps with third-party libraries Creating an architectural skeleton for future projects Mentoring of junior team members

## Experience

---

Feb-2021 - Nov-2021

### Efftabs Solutions LLP, Palarivattom

Flutter Developer

Worked in 2 apps in different domains and also created APIs for an existing Web-Application built using ASP. NET CORE and integrated it with the flutter app. Also built another application(E-cart) using firebase as back end.

Dec-2021 - Present

### Excelledia Ventures

Software Engineer

Working in many projects from different domains with pixel perfect UI and clean coding architecture.

## Education

---

2017-2020

### Mother Arts and Science College, Peruvallur

BSc Computer Science

2014-2016

### GMGHSS Kunnankulam

Plus Two

## Skills

---

Flutter/Dart

Firebase and services

Design Patterns

REST APIs

MVVM, MVC and MVP Architecture

Provider, Getx, Riverpod

Android

Git

MySQL

C#

## Projects

---

### CA- SUITE

CA-Suite was a web application that can be used to manage all operations in an Office. There were 3 user roles and role based authorizations in the Apps flow. The application was built using ASP. NET Core, so I was the one who created the APIs for the application and Integrated with the Flutter application.

### Eazi-Pharma

Eazi-Pharma was an E-cart Application with Firebase and services used as back-end.
